

iComm WM62T

High Performance Indoor / Outdoor
Wall Mount Speaker

VAL audio

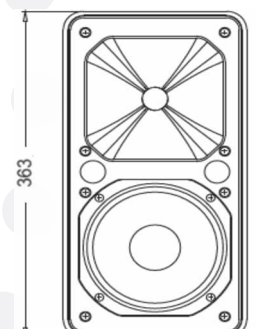

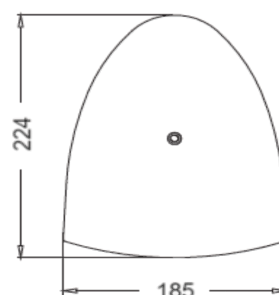

Die Liebe zur Musik

Upgrade your audio setup with the advanced VAL audio iComm WM62T indoor/outdoor monitor speaker, designed for high performance and resilience. Whether for home use, commercial spaces, or outdoor applications, this speaker delivers top-notch sound quality and durability, making it an ideal choice for any audio application.

- **High-Performance Audio:** Experience superior sound with this high-definition, two-way indoor/outdoor monitor speaker, delivering exceptional audio clarity and precision for diverse applications.
- **Audiophile-Grade Sound Quality:** Enjoy pristine sound with a 6" low-frequency driver featuring a durable rubber surround, and a 1" compression driver that ensures high SPL and smooth high-frequency response.
- **Versatile Operation:** The integrated Line Matching Transformer (LMT) supports both 100V and 16 Ω operation with multiple tapping options, providing flexibility for various audio system configurations.
- **Innovative Mounting Design:** The speaker's innovative design includes an easy-mounting U bracket, facilitating flexible installation and precise sound direction to achieve optimal audio coverage.

- **Durable Construction:** Constructed from high-quality weatherized polymer injection molded material, the cabinet is designed to meet IP56 standards, ensuring reliable performance in challenging outdoor conditions.
- **Complete Weatherproofing:** Fully weatherproof, windproof, and dust-proof, this speaker features an anti-UV aging multilayer functional grille, providing robust protection against environmental elements and ensuring long-lasting durability.
- **Protected Input Terminals:** A dust-proof and waterproof back cover safeguards the input terminals, protecting internal components from moisture and dust ingress.
- **Sleek Aesthetic:** Finished in a sleek Black colour, this speaker seamlessly integrates into various environments, providing both aesthetic appeal and exceptional sound performance.

APPLICATIONS

Indoor Applications:

- **Offices:** Enhance audio clarity for presentations, conferences, and background music.
- **Museums:** Provide crisp and clear audio for exhibits and informational displays.
- **Home Theatres:** Create an immersive audio experience for movies and media.
- **Auditoriums:** Ensure excellent sound distribution for speeches, performances, and events.
- **Gymnasiums:** Deliver powerful audio for fitness classes and sporting events.
- **F&B Establishments:** Enhance the ambiance with high-definition audio for diners and patrons.
- **Retail Stores:** Enhance the shopping experience with clear, high-quality sound.

Outdoor Applications:

- **Atriums:** Provide consistent and high-quality sound coverage in open spaces.
- **Poolside Areas:** Deliver robust, weather-resistant audio for poolside entertainment.
- **Patios:** Enhance outdoor gatherings with high-definition music and announcements.
- **Backyards:** Create an immersive audio environment for outdoor activities and parties.

SPECIFICATIONS

Power Handling (AES Standard)	80W RMS / 160W Program / 320W Peak
Nominal Impedance	16 ohms
Frequency Response (-10dB)	55Hz – 20KHz
Average Sensitivity	89dB/W/m
Calculated Max SPL	108dB Continuous / 111dB Program / 114dBPeak
Low Frequency Driver	1 x 6" (150mm) ferrite magnet / 1.5" voice coil
High Frequency Driver	1 x 1" (25mm) compression driver, ferrite magnet / 1" voice coil
Crossover Frequencies	2.4kHz passive
Dispersion	90° x 60°
Input Connectors	Phoenix terminals
Transformer Tapping	20W / 40W / 80W / OFF / 16Ω
Cabinet	High quality weatherised polymer injection molded cabinet with rust proof multi-layer aluminium grille
Wall mount bracket	Included, heavy duty swivel U bracket for horizontal and vertical mounting
Outdoor Capable	Weatherised to meet IP56 standard
Size (WxHxD)	185 x 363 x 224mm
Net weight	7Kg
